

**Energy Commission Monthly Meeting**  
May 6, 2015

Location: Senior Room A - City Hall Basement

---

**Commission members present Robert Saley, Aaron Charney, and potential member Craig Carlson. Also present was John DiModica from Noresco Company Meeting was opened at 7:05 pm.**

**John introduced himself and discussed what his company does. They work with large energy consumers to reduce their costs through energy efficiency, education and green technology. John stated that the first step is benchmarking and without it, taking the second step is very tough. We discussed with John that this idea is not new and that finding extra money in our municipal budget, in an election year, is hard to come by. We all still believe there is money to be saved and we will start with coordinating our benchmarking. After john left we continued our discussion on how to complete this.**

**Craig Carlson had asked me about being a member on this commission and I told him to come in to our meeting. We explained to Craig that he needs to submit his resume to the Mayor and that he will present his resume to the Council and they need to approve it. He will do this in May.**

**Adjournment was at 735pm.**

---

**First Caryn updated us about the cities benchmarking and that Amy Thompson, from the University Of New Haven, was and still is working with this.**

**Brian and Ted came to us to explain the slow permit process that they are experiencing in the West Haven Building Department. Caryn has spoken with the department head Mr Riccio, and has asked for a meeting with all parties to discuss our concerns. Caryn will set up meeting once she gets everyones schedules.**
